SESSION 2024/2025 - SEMESTER 1

ALTERNATIVE ASSESSMENT REPORT: PHASE 2

Name	CHOH JING YI
IC No. / Matric No.	040809050165/A23CS0296
Year / Program	2/SECPH
Section	2
Lecturer Name	DR.Seah Choon Sean
Case Study	KADA Cooperation System Redesign
System Name	KADA Cooperation
Group Name	TECHMEDICO

SECTION C – SQL AND INTERFACE IMPLEMENTATION (30 MARKS)

3.1 SQL Statement (DDL & DML)

Create TEN (10) SQL statements based on the following distribution, and provide screenshots of the output/results for each SQL statement:

```
CREATE TABLE IF NOT EXISTS `Member` (  
  `userID` INT AUTO_INCREMENT PRIMARY KEY,  
  `name` VARCHAR(100) NOT NULL,  
  `ic_no` VARCHAR(20) NOT NULL,  
  `gender` ENUM('Male', 'Female', 'Other') NOT NULL,  
  `religion` VARCHAR(50),  
  `race` VARCHAR(50),  
  `pf_number` VARCHAR(20),  
  `marital_status` ENUM('Single', 'Married', 'Divorced', 'Widowed') NOT NULL,  
  `registration_fee` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `share_capital` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `fee_capital` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `deposit_funds` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `welfare_fund` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `fixed_deposit` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `other_contribution` DECIMAL(10, 2) NOT NULL DEFAULT 0.00,  
  `created_at` TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  `updated_at` TIMESTAMP DEFAULT CURRENT_TIMESTAMP ON UPDATE  
  CURRENT_TIMESTAMP  
);
```

MySQL returned an empty result set (i.e. zero rows). (Query took 0.0064 seconds.)

```
CREATE TABLE IF NOT EXISTS `Member` (  
  `userID` INT AUTO_INCREMENT PRIMARY KEY, `name` VARCHAR(100) NOT NULL, `ic_no` VARCHAR(20) NOT NULL, `gender` ENUM('Male', 'Female', 'Other') NOT NULL,  
  `religion` VARCHAR(50), `race` VARCHAR(50), `pf_number` VARCHAR(20), `marital_status` ENUM('Single', 'Married', 'Divorced', 'Widowed') NOT NULL, `registration_fee` DECIMAL(10, 2) NOT NULL DEFAULT  
  0.00, `share_capital` DECIMAL(10, 2) NOT NULL DEFAULT 0.00, `fee_capital` DECIMAL(10, 2) NOT NULL DEFAULT 0.00, `deposit_funds` DECIMAL(10, 2) NOT NULL DEFAULT 0.00, `welfare_fund` DECIMAL(10, 2)  
  NOT NULL DEFAULT 0.00, `fixed_deposit` DECIMAL(10, 2) NOT NULL DEFAULT 0.00, `other_contribution` DECIMAL(10, 2) NOT NULL DEFAULT 0.00, `created_at` TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  `updated_at` TIMESTAMP DEFAULT CURRENT_TIMESTAMP ON UPDATE CURRENT_TIMESTAMP );
```

[Edit inline] [Edit] [Create PHP code]

```
INSERT INTO `Member` (`name`, `ic_no`, `gender`, `religion`, `race`, `pf_number`,  
  `marital_status`, `registration_fee`, `share_capital`, `fee_capital`, `deposit_funds`,  
  `welfare_fund`, `fixed_deposit`, `other_contribution`)  
VALUES ('John Doe', '123456789', 'Male', 'Christianity', 'Caucasian', 'PF123', 'Single', 100.00,  
5000.00, 1000.00, 2000.00, 300.00, 1500.00, 100.00);
```

	name	ic_no	gender	religion	race	pf_number	marital_status	registration_fee	share_capital	fee_capital	deposit_funds	welfare_fund	fixed_deposit	other_contribution	created_at	updated_at
1	John Doe	123456789	Male	Christianity	Caucasian	PF123	Single	100.00	5000.00	1000.00	2000.00	300.00	1500.00	100.00	2025-01-24 19:35:08	2025-01-24 19:35:08

```
CREATE TABLE IF NOT EXISTS `SavingAccount` (
  `savingAccountID` INT AUTO_INCREMENT PRIMARY KEY,

ANALISIS TERPERINCI KEWANGAN:

SECTION D (CONCLUSION AND REFLECTION)

4.1 Conclusion

1) Provide the conclusion of your proposed module.

(5 marks)

The Comprehensive Financial Reporting and Analysis Module has achieved significant progress in addressing the limitations of the previous financial reporting system. First achievements include enhanced reporting customization. The module allows users to generate detailed financial reports, including specific timeframes, transaction histories and loan details. In addition, the implementation of an enhanced report validation procedure guarantees that users can check and validate financial reports for accuracy before downloading the PDF report. In addition, financial reports now have visual aids like pie charts and bar charts that offer comprehensive analysis of loan interest payments and savings transaction, improving the accuracy and transparency of financial analysis.

Despite its achievements, the Comprehensive Financial Reporting and Analysis Module still faces a few limitations that can be improved. Currently, the module can only work with a few preset formats, like PDFs and static charts. Members who might need data in different or editable forms, such as Excel or CSV, for additional analysis are less flexible because of this restriction. To accommodate users with varying demands, it is proposed that reports be exported in multiple formats, including Excel, CSV, and interactive dashboards. Another suggestion to enhance the module is incorporate real-time data updates. This feature would allow users to access the most recent financial information without the need to manually refresh or regenerate reports. Real-time updates would significantly improve decision-making by ensuring users always have the latest data for their analysis and reporting purposes.

4.2 Reflection

Provide a reflection based on your WBL project.

Description (Pure Fact):

My group collaborated to develop the KADA WBL project. I took the lead in distributing tasks and focused on developing the Comprehensive Financial Reporting and Analysis Module, which aimed to address the limitations of the existing financial reporting system. My role involved designing features such as enhanced reporting customization, improved report validation, and visual data representations. Other team members contributed by working on the loan application module, user authentication module, administration module, membership application module, and saving account module. Our group collaborated effectively to complete all tasks.

Description – Feelings

At the beginning of the project, I felt overwhelmed due to the complexity of the tasks and the pressure to meet deadlines. Some team members required additional guidance to complete their tasks, which affected the overall progress of the project. Additionally, differences in working styles and expectations led to minor disagreements during the project. The main challenges we faced included limited time to complete tasks, difficulties in coordinating schedules for group discussions, and resource constraints, particularly during module testing. Despite these difficulties, I felt a sense of resilience within the group as we worked collaboratively to overcome obstacles and meet project deadlines. These challenges underscored the importance of teamwork, adaptability, and effective communication in ensuring the project's success.

Reflection: Evaluation

The experience of working on the KADA WBL project had both positive and negative aspects. On the positive side, the project provided an excellent opportunity to apply theoretical knowledge in a practical setting, which greatly enhanced my technical and problem-solving skills. Additionally, overcoming challenges together fostered a strong sense of accomplishment and camaraderie among team members. On the negative side, the complexity of the tasks and the limited time available led to significant stress. Some team members, including myself, struggled to meet their responsibilities and require team member guidance and support, which slowed the overall progress. These facts and feelings influenced my actions and behavior throughout the project. I often felt anxious about completing my tasks before the due date, which made me very cautious and compelled me to double-check my work before proceeding to the next part. However, I am incredibly thankful for the guidance and support provided by my team members as their encouragement helped me stay focused and motivated to deliver my best work.

Reflection: Analysis

I chose the KADA WBL project to reflect on because it was a significant learning experience that highlighted the importance of teamwork, adaptability, and effective problem-solving in a real-world context. This project taught me how to use PHP, HTML, and CSS to create a website design, providing practical exposure to web development. The main area of concern for the future is to focus on improving interface design and programming skills to create more user-friendly and visually appealing KADA systems while enhancing the technical functionality of the system. However, some questions remain, such as how to enhance technical skills, like advanced programming techniques, and how to develop a better user-friendly interface to further improve project outcomes. These questions will guide my future efforts to improve my technical expertise and project management abilities.

Reflection: Self-criticism

Looking back on the KADA WBL project, I realized there are areas where I can improve to achieve better results in future projects. One important area is improving my time management skills. I'll make sure to set aside more time for planning and debugging to avoid the rush and stress at the last minute. Another area I want to work on is enhancing my technical skills. I plan to join workshops on advanced programming techniques, like JavaScript frameworks and responsive design, to create better interfaces and improve system functionality. I'll also rely on resources like YouTube tutorials and coding platforms like Codecademy to help me learn and grow in these areas.
